Establishing Relationships with Community Resources for CCL

**While you are waiting for this session to begin…**
Write the name of a community organization you are considering partnering with here:

*Think about what you know of the community organization, and write your thoughts below:*  
Do they have a method for tracking participation? Is it electronic or on paper?

- Do they have the capability to provide information back to the participant's clinical provider?

- How do people currently find the community organization or its program?

- What barriers does your priority population face in accessing the program? What challenges does the program face in enrolling and retaining participants?

- Are there other community programs that might meet the needs of your priority population?

- What are some questions you have at this point for the community organization you're considering working with?

**During the presentations, consider:**
What are some questions and issues you would like input on from the panelists?

- What are some ways to address any gaps in your knowledge of the community programs you identified at the beginning of the session?
