While you are waiting for this session to begin...
Write the name of a clinical organization you are considering partnering with here:

Think about what you know of the clinic’s environment, and write your thoughts below:
Do they use an electronic health record? If so, which one?

To what community resources is the clinic currently referring? If so, how is the referral made (i.e., is it electronic or on paper)? How did the clinic identify that program?

Is it only given to the patient or is the resource contacted in any way?

At what point in the visit is the referral made? By whom is it given (doctor, patient coordinator, community health worker, front office staff, etc.)?

What are some questions you have at this point for the clinic you’re considering working with?

During the presentations, consider:
What are some questions and issues you would like input on from the panelists?

What are some ways to address any gaps in your knowledge of the clinics’ environments you identified at the beginning of the session?
